## Eagle Eye Networks Releases Verizon MiFi Cellular Modem Integration

*Eagle Eye Networks' customers can now connect to the Eagle Eye Cloud using only a cellular connection.*

**Austin, TX** – Eagle Eye Networks, Inc. today announced it has integrated the Verizon MiFi 4G LTE Global USB Modem U620L. Now any Eagle Eye Bridge or Eagle Eye Cloud Managed Video Recorder (CMVR) can be connected to the Eagle Eye Cloud Data Center using only a cellular connection. There are no additional fees from Eagle Eye Networks to utilize this feature.

The cellular modem can be purchased directly from Verizon and provides a fast, secure Internet connection at a reasonable price. Prior to Eagle Eye's Verizon support, customers were forced to utilize multiple expensive devices such as modems, routers, and switches to connect to the cellular network.

“Eagle Eye’s goal has always been to extend the power of the cloud to as many cameras as possible,” stated Dean Drako, CEO and Founder of Eagle Eye Networks. “In the past, we’ve done this for analog, IP, and wireless cameras. With this release, we are now able to serve locations that do not have reliable Internet.”

Eagle Eye Networks has developed a bandwidth conservation mode to minimize the data sent to the cloud from the Eagle Eye Bridge or CMVR. This ensures the monthly cellular use is modest, keeping operational costs low. This integration extends cloud video surveillance to remote locations, and places without wired Internet connectivity.

### About Eagle Eye Networks

Eagle Eye Networks delivers the fastest growing, on-demand cloud based security and operations video management system (VMS) providing both cloud and on premise recording. Eagle Eye also provides a cloud video API for integrations and application development. The Eagle Eye Platform offers secure, encrypted recording, camera management, mobile viewing and alerts – all 100% cloud managed. The API platform uses the Eagle Eye Big Data Video Framework™, with time based data structures used for indexing, search, retrieval and analysis of the live and archived video. Eagle Eye Networks sells through authorized reseller and installation partners.
