

Improve Restaurant Security and Operational Efficiency with Eagle Eye Cloud VMS

Modern, cloud-based security camera systems help restaurant owners monitor the state of their business and detect issues anywhere, at any time, before they result in liabilities. Not only does the Eagle Eye Cloud VMS simplify security camera management and provide unlimited scalability, but it ensures workers are upholding health standards while preventing losses and creating a comfortable atmosphere for customers to order and enjoy their food and beverages.

Strategic Insights with Advanced Video Analytics

Gain real-time insight into customer behavior while minimizing theft, break-ins and vandalism with Line Crossing, People Counting and more.

Investigate Suspicious Cash Register Transactions

Integrating POS and video surveillance enables you to view sales and payment data in one place, eliminating the need to run multiple platforms.

Why Restaurants Choose Eagle Eye Cloud VMS

More Benefits Eagle Eye Networks Offers

- Remote access streamlines management and visibility across restaurant chains with multiple locations
- Incident-based alerts and video timestamps strengthen security
- Third-party point-of-sale (POS) integrations help quickly identify fraudulent transactions
- Intuitive Cloud VMS anyone with any level of skill level can use
- Compatibility with a broad range of cameras, including IP, analog and HD over Coax models
- Flexible pricing plans and free continuous software updates
