

Student safety is a top priority in every K-12 classroom. This is especially true for more vulnerable students who have special needs. States across the country have begun to introduce laws requiring security cameras in special education classrooms. In some states, retention requirements can be up to 90 days.

The Eagle Eye Cloud VMS is a simple, scalable solution designed to accommodate an unlimited number of sites, retention requirements, and users.

- Cloud video storage at 1080p for 90+ days
- Fully secure, remote monitoring from any desktop or mobile device
- Scalability at a flexible price point with over 3,000 compatible cameras, including IP, analog and HD over Coax
- Improve emergency response time by pre-designating first responders who receive real time security camera access

What to Consider When Selecting a Video Surveillance Solution for Your Classrooms

Successful deployment of a video security system in schools is dependent on good planning. Requirements for video security cameras in special education classrooms vary by state so understanding what needs to be met, and how you can meet them, is crucial.

- How many cameras are needed to cover designated areas?
- Do audio recordings need to be captured?
- How long do recordings need to be retained?

Eagle Eye Networks has extensive experience protecting schools across the nation, collaborating with schools to provide modern, simple-to-use video surveillance solutions. Let's work together to get the right solution to address your needs.
