

## Move Your Business Operations to the Cloud with a Cloud-Based Security System

With the Eagle Eye Cloud VMS, you can quickly take your restaurant to the Cloud, allowing you to monitor the state of your business and detect issues anywhere, any time. Because now more than ever you need an extra set of eyes on your restaurant to monitor performance, efficiency, and security. Follow these five tips to improve restaurant security and operational efficiency:

### ✓ 1. Drive Down Loss Prevention

Integrate your point-of-sale (POS) system and video surveillance system to view sales and payment data in one place. This eliminates the need to run multiple platforms and helps swiftly identify and act on fraudulent transactions.

### ✓ 2. Get the Most Out of Your Existing Technology Investments

Eagle Eye VMS is compatible with thousands of leading manufacturers' cameras, including IP, analog, and HD over Coax. There's no need to rip and replace your existing infrastructure or squander the investment you've already made in technology and equipment.

### 3. Gain Strategic Insights with Video Analytics ✓

Transform your video security system into a tool for business optimization with analytics. Gain real-time insight into trends and patterns around your restaurant, such as peak hours, traffic flow, and customer behaviours. Analytics tools include Line Crossing, People Counting, Camera Tampering, Loitering, and more. Remote access streamlines management and visibility across restaurant chains.

### ✓ 4. Uphold Health Standards

Remotely view multiple locations on any device to ensure food safety and store cleanliness meet your standards of service. For example, monitor kitchen and food prep stations to mitigate potential risks and ensure proper food handling. And, remotely view locations to ensure you're maintaining proper staffing and service levels and pinpointing areas for staff training.

### ✓ 5. Manage Your Budget

With an Eagle Eye Networks subscription, you can more easily plan your monthly budget. You have the flexibility to choose a subscription on a per-camera basis, depending on your specific needs for resolution, retention, and where you store your data – on-premise or in the cloud. Our pricing is flexible, user-friendly and built around your budget. You only pay for the cameras in use.
