

Cloud Video Surveillance

Protect Customers, Staff, and Assets with Eagle Eye Networks

Financial institutions face a number of challenges, from protecting customer data, to remaining PCI compliant, to preventing robberies and vandalism. Reliable video surveillance is key to facing – and overcoming – these demands. Eagle Eye Networks is a 100 percent cloud recording solution that simplifies user management, enables remote monitoring, and provides unlimited scalability. Store your video in the cloud, on-premises, or both for reliability and redundancy.

Why Bank Leadership Chooses the Eagle Eye Cloud VMS

- Enables remote access to streamline security management and give visibility across multiple branch locations
- Over 3,000 compatible cameras including IP, analog, and HD over Coax models
- Offers flexible pricing plans and free continuous software updates with new tools and features
- Strengthens security with built-in incident-based alerts and video timestamps
- Provides insights into any event using advanced analytics, so security personnel can identify and implement quick resolutions
- Improves emergency response times by pre-designating security access to first responders

MANAGE SENSITIVE LOCATIONS WITH BEST-IN-CLASS ACCESS CONTROL INTEGRATIONS

Create a safer, more secure environment with cloud video surveillance and cloud access control. View your facilities and perimeter activity from anywhere in a single interface with powerful integrations from best-in-class access control companies.
