

Cloud Video Surveillance

Create a Safe, Clean Space for Gym Members to Focus on their Fitness Goals

Having a reliable video security system improves visibility into your gym's day-to-day operations and reduces your exposure to liability. Users can quickly navigate between cameras spread across multiple buildings or locations. Give current members a safe, clean space to work out and attract new members with your reputation for customer service using the Eagle Eye Cloud VMS.

Benefits of Eagle Eye Cloud VMS for the Supply Chain

The Eagle Eye Cloud VMS provides centralized management of all cameras across locations, making it easy to monitor activity and prevent liabilities.

- Prevent crimes like vandalism and break-ins
- Monitor foot traffic and staff the proper amount of employees accordingly
- Keep an eye on equipment to ensure it's always clean and in working condition
- Receive alerts when someone enters an off-limit area or when cameras are being blocked, covered, or moved
- Footage from incidents can be easily reviewed for liability mitigation

CUSTOMER TESTIMONIAL

"Eagle Eye allows me to see all of my clubs all at once, ensuring brand consistency and high levels of customer service. I can also grant access to the regional and assistant managers, so they can view their clubs from their phones. Now, we are much more efficient, as an organization, with our overall operations."

- Joe Bernatowicz, Franchisee, Planet Fitness
