CLOUD VIDEO SURVEILLANCE

Eagle Eye 2-Way Audio Data Sheet

Integrate audio communication with your cloud video surveillance system.

2-Way Audio Uses:

CUSTOMER SUPPORT

Provide assistance and communicate with visitors and customers.

COMMUNICATE WARNINGS

Notify a designated area of immediate alerts during critical incidents.

DETER THREATS

Remotely warn suspicious individuals, minimizing security and liability threats.

MANAGE CROWDS

Make public address announcements to inform and control crowds.

IMPROVE BUSINESS OPERATIONS

Communicate with staff about business needs to improve customer experience.

Communicate Remotely Through Your Surveillance System

Eagle Eye Networks 2-Way Audio is a bidirectional audio feature for users to remotely communicate through the Eagle Eye Cloud VMS (Video Management System) to any audio-connected location. Incorporate audio communication capabilities using IP cameras with integrated microphones and speakers or third party speakers and horns to improve situational awareness, security, and operations.

SUPPORTED DEVICES

Eagle Eye 2-Way Audio works with:

- ⊘ IP cameras with an integrated microphone and speaker
- ⊘ Approved third-party IP speakers/horns including popular models from Axis and Zenitel
- ⊘ Additional third-party IP speakers can be added, contact your sales manager

Eagle Eye 2-Way Audio Part Numbers

2-Way Audio is available as an add-on subscription to manage supported audio-enabled cameras or IP speakers/horns. Each camera or device using audio requires a separate 2-Way Audio subscription.
