

Cloud Video Surveillance

Affordable, Centralized Surveillance
Solutions for Schools

Eagle Eye Networks makes it easy to move to a modern cloud-based surveillance system for every level of education, from kindergarten to high school to university. The Eagle Eye Cloud VMS (video management system) provides a flexible, cost-effective solution that will work with existing cameras minimizing capital expenses. Use state-of-the-art artificial intelligence to improve operations, save time and manpower, receive alerts, and automate systems.

Improve Campus Safety with Eagle Eye Cloud VMS

- Secure, remote access to all cameras and locations.
- Manage multiple cameras, locations and users from a single interface with centralized video management.
- Easily access, save, and share important video clips.
- Budget friendly system with minimal up-front hardware costs and discounted annual plans.
- Improve emergency response time by providing designated first responders with realtime security.
- Scalability at a flexible price point with over 3,000 compatible cameras, including IP, analog and HD over Coax models.

AI-POWERED ANALYTICS

- **Smart Video Search:** Search video for people, vehicles, or objects to quickly identify suspicious activity.
- **License Plate Recognition:** Track bus fleets entering and leaving bus yards and identify vehicles parking in reserved areas like faculty parking.
- **Object Counting:** Monitor the number of students and staff entering and exiting campus buildings or know when a gym or auditorium reaches capacity.
- **Loitering:** Setup custom alerts for trespassers after hours in parking lots, playgrounds or stadiums.
- **Intrusion Detection & Line Crossing:** Protect valuables like sound equipment, trophies or important documents with real-time alerts when someone enters a restricted area.
