EAGLE EYE NETWORKS

HOSPITALITY
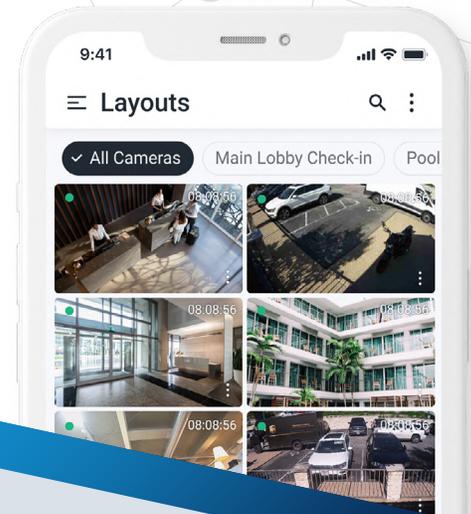

Cloud Video Surveillance

Protect your brand reputation while creating a safe and comfortable environment for guests

Thousands of people pass through your hotel on a regular basis between guests, staff, and vendors. Whether you are looking to protect a single hotel or a global chain of locations, Eagle Eye Networks has a solution to meet your needs.

Hospitality industry leaders choose Eagle Eye Networks

The Eagle Eye Cloud VMS simplifies your security management and provides unlimited scalability to future proof your investment.

- Streamline video surveillance with remote access and the ability to quickly navigate between cameras across multiple locations

- Choose new cameras from over 3,000 compatible cameras or use your existing analog cameras

- Flexible pricing plans and free continuous software updates

- Manage access to sensitive locations with access control integrations

Advanced analytics uncover ways to improve guest visits

The Eagle Eye Cloud VMS has an array of advanced analytics that elevate your security operation and transform your video camera system into a powerful tool for business optimization.

- Monitor the number of guests and staff entering and exiting the building, and discover peak traffic times and traffic flow patterns.

- Receive alerts when cameras are being blocked, covered, or moved.

- Protect restricted and vulnerable areas by receiving an instant alert when someone enters a predetermined area.

- Reduce thefts, vandalism, and break-ins after business hours.
