

QUICK SERVE RESTAURANTS

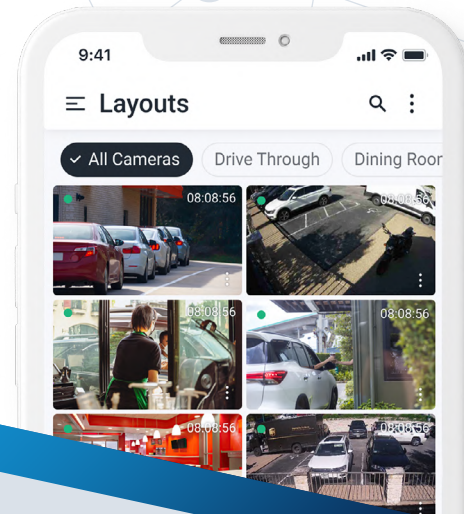

Cloud Video Surveillance

Improve restaurant security and operational efficiency

Modern, cloud-based security camera systems help restaurant owners monitor the state of their business and detect issues anywhere, at any time, before they result in liabilities. Create a comfortable atmosphere for customers, ensure employees are upholding health standards, and drive down loss prevention with the Eagle Eye Cloud VMS.

Why quick serve restaurants choose the Eagle Eye Cloud VMS

- Remote access streamlines management and visibility across restaurant locations
- Incident-based alerts and video timestamps strengthen security
- Third-party point-of-sale (POS) integrations help quickly identify fraudulent transactions
- Intuitive user interface that anyone can use
- Compatibility with a broad range of cameras, including IP, analog, and HD over Coax models
- Flexible pricing plans and free continuous software updates

Purpose-built for cloud video surveillance

- **Strategic insights with video analytics:** Gain real-time insight into customer behavior while minimizing theft, break-ins, and vandalism with Line Crossing, People Counting, and more.
- **Monitor cash register transactions:** Integrating POS and video surveillance enables you to view sales and payment data in one place, eliminating the need to run multiple platforms.
- **Compatible with over 3,000 cameras:** Migrate analog cameras to the cloud without the need to replace or rewire your existing camera system.
- **Flexible monthly subscriptions:** Our pricing is flexible, user-friendly, and built around your budget. You only pay for the cameras in use.
