RESTAURANTS

Cloud Video Surveillance

Improve restaurant security and operational efficiency

Modern, cloud-based security camera systems help restaurant owners monitor the state of their business and detect issues anywhere, at any time, before they result in liabilities. Create a comfortable atmosphere for customers, ensure workers are upholding health standards, and drive down loss prevention with the Eagle Eye Cloud VMS.

Why restaurants choose the Eagle Eye Cloud VMS

- Remote access streamlines management and visibility across restaurant locations

- Incident-based alerts and video timestamps strengthen security

- Third-party point-of-sale (POS) integrations help quickly identify fraudulent transactions

- Intuitive Cloud VMS can be used by all skill levels

- Compatibility with a broad range of cameras, including IP, analog, and HD over Coax models

- Flexible pricing plans and free continuous software updates

Strategic insights with advanced video analytics

- Gain real-time insight into customer behavior while minimizing theft, break-ins, and vandalism with Line Crossing, People Counting, and more.

- Integrating POS and video surveillance enables you to view sales and payment data in one place, eliminating the need to run multiple platforms.
