

CLOUD VIDEO SURVEILLANCE

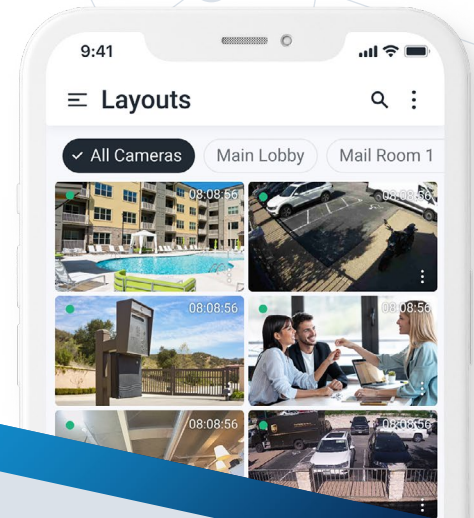

HOA/Subdivision Gates Solution

Accurate, timely security Information for your neighborhood

Homeowners' associations (HOAs) and subdivisions come with their own sets of security challenges. Residents count on managers to monitor ingress and egress into the community, ensuring safety to all who live there. HOA managers and subdivisions need an affordable solution that also provides accurate information about vehicles and pedestrians entering and exiting the neighborhood.

Utilize the key benefits of Eagle Eye LPR (license plate recognition) capabilities

- Easily monitor the vehicles using your access gate with Eagle Eye's LPR (license plate recognition) capabilities. Eagle Eye LPR uses AI to accurately detect and recognize license plates in all kinds of challenging conditions.
 - Moving vehicles (up to 56 km/hr)
 - Different fonts and stacked characters
 - Poor weather conditions
 - Difficult camera angles
 - Dirty license plates
- Eagle Eye LPR operates on readily available surveillance cameras, making it an affordable and practical option for business owners who are interested in license plate recognition but do not want to buy expensive, specialized LPR or ANPR cameras.

Use Eagle Eye's Smart Video Search to further enhance safety in your subdivision

- Search through hours of video in the blink of an eye using natural language ("red Honda")
- Monitor your pedestrian gates similarly ("man with blue shirt")
- Above all, keep your community safe and well monitored

Partnerships

Partner Brivo keyless entry access cards with Eagle Eye to secure access to your neighborhood while also monitoring who comes in and out. Brivo integrates smoothly to provide for all your entry permission needs.
