

SMART VIDEO SURVEILLANCE

Eagle Eye Camera Direct Complete Data Sheet

Eagle Eye Networks affordable
direct-to-cloud surveillance solution

Uses for Camera Direct Complete

Businesses looking for cost-effective surveillance and needing 1-4 cameras per location.

Locations with a small camera count.

Potential customers where capital expense concerns are a major factor.

Eagle Eye customers needing a single camera in a remote location.

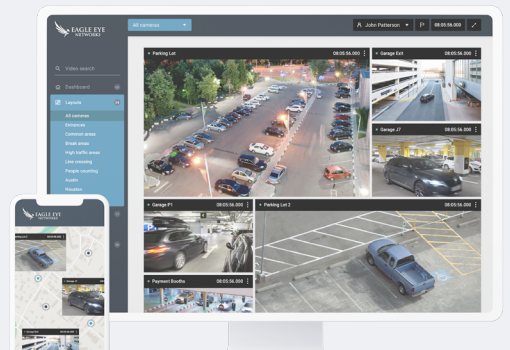

Resellers wanting a fast and simple installation option.

Eagle Eye direct-to-cloud video surveillance

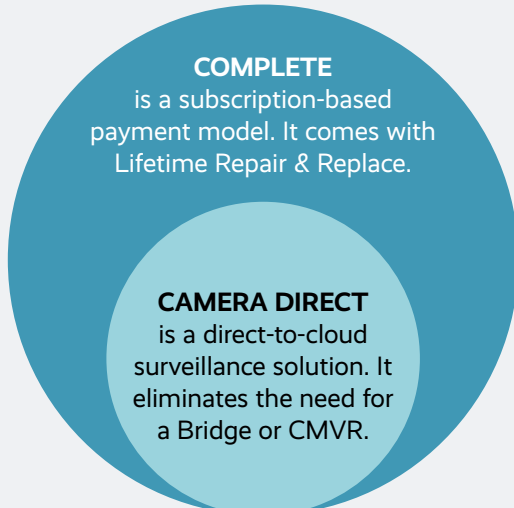

Eagle Eye Camera Direct Complete is a simple solution ideal for businesses with multiple locations requiring only a few cameras at each location or where the upfront investment is a major factor in the decision. Easily add Camera Direct Complete supported cameras to the Eagle Eye Cloud VMS without the need for an Eagle Eye Bridge. Leverage the benefits of the award-winning Eagle Eye Cloud VMS:

- **Secure cloud storage**
Retain encrypted video with triple cloud redundancy for secure and easy access.
- **Automatic updates**
Receive continuous system updates via the cloud connection.
- **Remote access**
Access a full resolution stream of live and recorded video from anywhere in the world.
- **Cloud management**
Update user access, retention, resolution of your cameras, and more at any time.
- **Artificial intelligence**
Find people or vehicles immediately with cloud-based AI features like Smart Video Search and Smart Layouts.
- **Motion detection**
Configure and get motion detection events on live and recorded video.
- **Notifications**
Get notifications if motion is detected or a camera goes offline.

Eagle Eye Camera Direct Complete
