

OPEX PURCHASING PROGRAM

Eagle Eye Complete

Budget-Friendly Smart Video Surveillance

Eagle Eye Complete

Flexible pricing and peace of mind

Eagle Eye Networks introduces the Eagle Eye Complete Family of products — a budget-friendly subscription pricing model for customers looking for professional video surveillance without a large investment.

Instead of paying for the hardware as a capital expenditure and placing a PO for a large upfront purchase, customers can deploy Eagle Eye hardware as part of their subscription. The customer pays a nominal setup fee per hardware device and then a monthly subscription for hardware with their Eagle Eye Cloud VMS (video management system). The fixed subscription is easy to budget for and includes Lifetime Repair & Replace, meaning no unexpected costs in the future.

Future Proof Video Surveillance

The Eagle Eye Cloud VMS grows with changing business needs and improves over time with automatic updates. On-premise systems quickly become dated and lack the latest technology. Upgrading these systems is often costly and time consuming.

New AI technology is changing how organizations use their surveillance systems and now business leaders can plan for the future of business security without a significant capital investment.

Ideal Solutions For:

- ✓ Businesses wanting to move to the cloud without a large investment
- ✓ Small businesses
- ✓ Organizations with fixed annual budgets
- ✓ Customers looking to add to their existing Eagle Eye Cloud VMS
- ✓ CapEx conscious operations

Benefits of Eagle Eye Complete

Reduced Upfront Costs

Eliminate the need for capital expenditures

No Unpredictable Expenses

Lifetime Repair & Replace covers hardware replacement when needed

Scalability

Easily scale to meet evolving business needs and expand the capabilities of a VMS

Predictable Operational Budgets

Align hardware expenses with operational budgets

Cost-effective VMS Conversion Tool

Move an existing VMS to the Eagle Eye Cloud VMS without a major upfront investment in new hardware

Expanded Security Options

A large selection of products to meet unique security needs and budgets

LIFETIME REPAIR & REPLACE

Enjoy peace of mind with comprehensive coverage for repairs throughout the product's lifetime as long as the hardware is under an active subscription. Get failed equipment replaced without unpredictable expenses.

Eagle Eye Camera Direct Complete

Direct-to-cloud video surveillance

Eagle Eye Camera Direct Complete is a simple, budget-friendly solution for businesses where price is just as important as the quality of the VMS. Customers with adequate bandwidth that are looking to reduce CapEx spending now have the perfect fit.

With Eagle Eye Camera Direct Complete, the camera or cameras are included with the subscription. Additionally this direct-to-cloud option eliminates the need for an Eagle Eye Bridge, further reducing the upfront investment.

Easily add Camera Direct Complete supported cameras to the Eagle Eye Cloud VMS without the need for an Eagle Eye Bridge.

Uses for Camera Direct Complete:

- Businesses looking for cost-effective surveillance and needing 1-4 cameras per location
- Remote locations with a small camera count
- Potential customers where capital expense concerns are a major factor
- Eagle Eye customers needing a single camera in a new location
- Resellers wanting a fast and simple installation option

Eagle Eye Camera Direct Complete supports a range of Eagle Eye camera models, including bullet, dome, and turret cameras. All Camera Direct supported cameras are available as an Eagle Eye Complete subscription or as a direct hardware purchase.

Eagle Eye Bridge / CMVR Complete

Eagle Eye Bridge / CMVR Complete is a cost-effective way for organizations to move their existing surveillance system to the cloud without a large capital investment.

Get the benefits of the Eagle Eye Cloud VMS (video management system) while paying for the hardware as part of the subscription. Eagle Eye Networks is the only video management system that allows you to keep your existing cameras and infrastructure or choose the security camera that is best for your needs and budget. Only a nominal one-time setup fee is needed to get started.

Eagle Eye Bridge/CMVR Complete includes Lifetime Repair & Replace on hardware as long as you are a subscriber.

All Bridge/CMVR Complete subscriptions include a quantity of camera subscriptions. These range from 5 subscriptions to 50 subscriptions depending on the Bridge/CMVR model. Camera subscriptions are optimized for 30-day retention but other camera subscription options can be substituted.

EAGLE EYE BRIDGE

An Eagle Eye Bridge is an on-premise device used by the Eagle Eye Cloud VMS to connect cameras to Eagle Eye cloud data centers. Offered in various configurations, the bridges enable you to receive and analyze video from your cameras. In addition, they provide on-prem buffering for bandwidth management and encrypted transmission to the cloud.

EAGLE EYE CMVR

The Eagle Eye Cloud Managed Video Recorder (CMVR) addresses bandwidth challenges and redundant storage needs. Similar to the Bridge in that it's a local device that connects cameras to the cloud, our CMVR has the added ability to store video locally. We offer a full range of CMVRs from compact to enterprise and everything in between.

All Eagle Eye Bridges and CMVRs are available as an Eagle Eye Complete subscription or as a direct hardware purchase.

New Complete Products Coming Soon

Eagle Eye Networks will be adding new products to the Complete lineup in 2024 — making “cloud-based” video surveillance with AI and analytics accessible to more organizations than ever before.

Eagle Eye Anywhere Camera Direct Cabinet System Complete

Add video surveillance anywhere — connect to the cloud with no wired internet or power

Extend the reach of your security system with this solar-powered, direct-to-cloud cellular outdoor camera solution. Eagle Eye Anywhere Camera Direct Cabinet Systems provide convenient solutions for outdoor surveillance installations to connect to the Eagle Eye Cloud VMS (video management system) if wired power and network connections are not available.

Applications for Eagle Eye Anywhere Camera Direct Cabinet System Complete

- **Parking or perimeter areas with available power**
- **Industrial: power infrastructure, oil and gas, water treatment facilities**
- **Commercial: warehouses and lots, equipment/fleet parking**
- **Parks and outdoor recreational facilities**
- **Construction: site surveillance and perimeter security**
- **Property Management: parking lots, gates, dumpsters**
- **Farming and Cannabis: fields, greenhouses, equipment storage**

All Cabinet Systems are available through Eagle Eye Complete subscriptions or as a direct hardware purchase. New Cabinet System models will be available soon. Camera subscriptions are sold separately.

Customers around the globe in virtually every industry trust Eagle Eye Networks for actionable business intelligence and security.
