

Eagle Eye Camera Direct Feature Sheet

Direct-to-cloud surveillance solution
from Eagle Eye Networks

AVAILABLE AS

CapEx or
OpEx

Uses for Camera Direct

Businesses looking for cost-effective surveillance and needing 1-6 cameras per location.

Locations with a small camera count.

Eagle Eye customers needing a single camera in a new location.

Resellers wanting a fast and simple installation option.

Eagle Eye direct-to-cloud video surveillance

Eagle Eye Camera Direct connects cameras without an Eagle Eye Bridge/CMVR and is ideal for businesses requiring only a few cameras at each location. You can easily add and populate your new cameras' MAC addresses simply by scanning a QR code. And once the system is up and running, you enjoy the benefits of cloud synchronization. Even if the network goes down or a camera is damaged or stolen, your video is safely encrypted and stored in the cloud for easy access.

Leverage the benefits of the award-winning Eagle Eye Cloud VMS:

- **Secure cloud storage**
Retain encrypted video with triple cloud redundancy for secure and easy access.
- **Automatic updates**
Receive continuous system updates via the cloud connection.
- **Remote access**
Access a full resolution stream of live and recorded video from anywhere in the world.
- **Notifications**
Get notifications if motion is detected or a camera goes offline.
- **Cloud management**
Update user access, retention, resolution of your cameras, and more at any time.
- **Artificial intelligence**
Find people or vehicles immediately with cloud-based AI features like Smart Video Search and Smart Layouts.
- **Motion detection**
Configure and get motion detection events on live and recorded video.
- **Camera I/O**
Connect devices like sirens, lights, and speakers to the Camera I/O Port and control them remotely using Eagle Eye VMS Cloud. Video also gets recorded if any of the ports is triggered.

Flexible and Futureproof

Camera Direct cameras can be used in conjunction with existing Eagle Eye Bridge/CMVR-supported cameras to expand your security coverage. As your application grows, you can add any Eagle Eye Bridge/CMVR to increase capacity.

Cybersecure

Camera Direct cameras use the same Eagle Eye Complete Privacy Encryption(™) technology implemented in the Eagle Eye Security Camera VMS to encrypt and ensure that video is private and secure. Data is encrypted at rest and during transmission.

Overcome Downtime with Edge Storage Cloud Sync

Sync all video to the cloud without worrying about lost footage if network interruptions knock your camera offline. Edge Storage Cloud Sync efficiently transfers recorded video from hardened onboard data storage to Eagle Eye Cloud VMS when the connection is restored, while all previously transmitted video remains safely accessible.

Supported cameras

EN-CDUM-008a	Eagle Eye Camera DM08 Outdoor Mini Dome 4Mpix, H265, IR, IP66, 3.6mm Lens, Microphone, POE, SD Card
EN-CDUM-008b	Eagle Eye Camera DM08b Outdoor Mini Dome 4Mpix, H265, IR, IP66, 2.8mm Lens, Microphone, POE, SD Card
EN-CDUB-010a	Eagle Eye Camera DB10 Outdoor Mini Bullet 4Mpix, H265, IR, IP66, 2.8mm Lens, WDR, POE, SD Card
EN-CDUB-011a	Eagle Eye Camera DB11 Outdoor Bullet 4Mpix, H265, IR, IP66, 2.7mm-13.5mm Moto Lens, WDR, POE, SD Card
EN-CDUB-012a	Eagle Eye Camera DB12 Outdoor Mini Bullet 8Mpix, H265, IR, IP66, 2.8mm Lens, WDR, POE, SD Card
EN-CDUB-013a	Eagle Eye Camera DB13 Outdoor Bullet 8Mpix, H265, IR, IP66, 2.7mm-13.5mm Moto Lens, WDR, POE, SD Card
EN-CDUD-007a	Eagle Eye Camera DD07 Outdoor Vandal Dome 4Mpix, H265, IR, IP66, IK10, 2.8mm Lens, WDR, POE, SD Card
EN-CDUD-008a	Eagle Eye Camera DD08 Outdoor Vandal Dome 4Mpix, H265, IR, IP66, IK10, 2.7mm-13.5m Moto lens, WDR, POE, SD Card
