

EAGLE EYE COMPLETE

Future-proofed video surveillance at a low monthly cost

The Eagle Eye Complete advantage

As new uses for video surveillance data emerge, access to AI features like license-plate recognition and natural language search is vital. But how do you build a system flexible enough to grow with your needs, and affordable enough to get started with?

The Eagle Eye Complete portfolio enables full-featured professional video surveillance without a large capital investment for required hardware. Instead, it gives you a consistent OpEx subscription pricing model backed by industry-leading support. With no large upfront budget commitment, you pay only a nominal setup fee to receive Lifetime Repair and Replace and ensure that you will never have unexpected hardware costs if equipment fails outside of warranty. Take advantage of Eagle Eye solutions with OpEx predictability and peace of mind.

From cameras to bridges to switches, nearly all Eagle Eye hardware offerings are available as part of the Eagle Eye Complete portfolio, including our innovative, award-winning Eagle Eye 911 Camera Sharing solution and our Eagle Eye Anywhere Cabinet Systems.

If this isn't enticing enough, there's more. When you purchase your Eagle Eye Bridges/CMVRs as Complete, you unlock special, significantly lower camera subscription pricing and simplification. You'll be able to get up to HD4-D60 (4MP and 60 days of cloud retention) for one low price and as a single SKU. Easier to train, educate and sell to end customers

Together, all this means:

- Reduced capital expenditures
- Predictable expenses
- Cost-effective conversions from alternate video management systems
- Scalability without expensive overprovisioning
- Access to industry-leading analytics and AI features

Lifetime Repair & Replace

Enjoy peace of mind with comprehensive coverage to replace or repair the equipment without cost. End customers can rest assured that they won't be surprised and frustrated by the need to purchase new equipment outside of warranty and resellers can establish consistent, predictable recurring costs.

The Eagle Eye Complete portfolio

Unlocking Complete with Eagle Eye Bridges and CMVRs

Organizations can move their surveillance system to the cloud without a large capital investment by selecting the Eagle Eye Bridges or CMVRs they need for a low-monthly cost, and enjoy peace of mind with Lifetime Repair & Replace. Simply choose a Bridge for cloud retention installations, or a CMVR for greater on-site buffering and optional cloud storage.

When purchasing a Bridge/CMVR as Complete, you receive the added benefit of increased value and a reduced price point for Eagle Eye camera subscriptions. Your Bridge/CMVR Complete purchase unlocks simplified and significantly reduced pricing for camera subscriptions. Now you can take advantage of one price point for any resolution and/or retention needs (up to 4MP and 60 days of cloud retention) — only offered when you purchase the Bridge/CMVR as Complete.

All Bridge/CMVR Complete subscriptions unlock your access to much more affordable high-definition video retention.

Eagle Eye Camera Direct

Your Eagle Eye Camera Direct Complete subscription includes the cameras you need (including any Eagle Eye-branded camera, up to 4MP) paid for on an OpEx subscription model. And with Camera Direct, there's no need for an Eagle Eye Bridge, further reducing the upfront investment.

Camera Direct is perfect for businesses looking for cost-effective surveillance, with 1-6 cameras per location.

Eagle Eye 911 Public Safety Camera Sharing

Eagle Eye 911 Camera Sharing allows for pre-designated cameras to be shared directly with 911 telecommunicators in the event of an emergency, providing instant situational awareness to better direct first responders when it matters most. This solution works even for customers using alternate video management systems and purchasing this as Complete further reduces constraints to enable this technology.

EAGLE EYE BRIDGES AND CMVRs EXPLAINED

An Eagle Eye Bridge connects your cameras to Eagle Eye cloud data centers, enabling you to receive and analyze video from your cameras. In addition, they provide on-premise buffering, bandwidth management and video encryption.

Eagle Eye's full range of Cloud Managed Video Recorders (CMVRs), like our Bridges, connects your cameras to the Eagle Eye Cloud VMS, but also addresses bandwidth challenges with more local video storage, so you can securely transmit video data when most practical for your budget or your available bandwidth

OTHER ENTRY POINTS TO COMPLETE

Besides Eagle Eye Bridges and CMVRs, the advantages of Complete are available with the subscription-based purchase of Eagle Eye Switches, Eagle Eye Cabinet systems, and even individual Eagle Eye-branded cameras, each provisioned with an appropriate number of HD4-D60 camera subscriptions.
